## ABOUT ME

I am a passionate software developer with over one year of hands-on experience and a graduate of the University of Science, majoring in Mathematics and Computer Science. I have worked with Blazor, .NET 8, and the ABP Framework to develop and maintain scalable web applications. I am strong in problem-solving, collaborate effectively in team environments, and learn new technologies quickly. My goal is to contribute to real-world projects, work alongside experienced professionals, and continue growing as a software developer.

## PROFESSIONAL EXPERIENCE

### **.Net Developer | 10/2024 - 2/2026**

HQSoft - Ho Chi Minh City

**Tech Stack:** .NET 8, ABP Framework, Blazor, PostgreSQL, RESTful APIs.

#### **Xspire - .Net Developer**

Participated in the analysis, design, and development of modules within the DMS system, including:

- Display Program Management
- Competitor Management
- Display Program Effectiveness Evaluation

Developed the SO (Shipment Order) module to support shipment and delivery workflows in the eSales system.

Designed database structures, built user interfaces using Blazor, and implemented end-to-end business workflows for core functional screens.

#### **SFA - Backend Developer**

Participated in the analysis, design, and backend development of the SFA system, including database design and API development for the mobile team, with features such as:

- Distributor Inventory Management
- Trade Promotion Programs
- POSM Delivery Management

### **Ajinomoto – .Net Developer**

Participated in the analysis, design, and development of modules within the Order Management system, including:

- Database design for sales-related entities and workflows
- Implementation of the end-to-end standard Sales Order process
- Implementation of the end-to-end Vehicle-based Sales Order workflow
- Enhancement and completion of Promotion Program functionalities

Participated in backend development for Ajinomoto’s mobile application, supporting sales transactions, free-of-charge (FOC) items, and product exchange/returns.

---

## **SKILL**

### **Programming Languages**

C#: Object-oriented programming, SOLID principles, LINQ, async/await, generic programming, extension methods, exception handling, data annotations.

### **Version Control & API Testing**

Git, GitHub, GitLab: Repository management, branching & merging, push & pull.  
Postman, Swagger: API testing and documentation.

### **Front-end Development**

HTML, CSS, DevExpress, Bootstrap, JavaScript, Reactjs, Responsive Design.  
Basic experience with Blazor UI development.

### **Frameworks & Technologies**

.NET Core: ABP Framework, Web API, ASP.Net, MVC, Entity Framework Core, Identity. Others: JWT authentication, Repository Pattern, Unit of Work Pattern, Dependency Injection, CQRS.

### **Software Development Practices**

N-tier Architecture, DDD Architecture, Front-end Development Clean Code, SOLID Principles

### **Database Management**

SQL Server, MySQL, PostgreSQL.

---

## **EDUCATION**

### **University Of Sciences – VNU HCM | 2021 – 2025**

Bachelor of Mathematics and Computer Science

- Specialization: Software engineering
- GPA: 8.25
